

*Summary Backend Software Engineer with 3+ years of experience designing and scaling distributed backend systems

*Skills **Programming Languages:** Golang, Python, JavaScript, TypeScript, SQL, Solidity, C++, C, PHP, Bash,

Backend & Frameworks: Gin, Node.js, Express.js, REST APIs, Apache Kafka, Redux, Next.js, React

AI / LLM Tooling: LangChain, LangGraph, Langfuse, HuggingFace Transformers, Groq SDK, Prompt Engineering

Databases & Caching: PostgreSQL, Cassandra, Redis, MongoDB, SQLite

Tools & Platforms: Docker, Kubernetes, Git, Windmill, Devtron, Remix, Ethereum

Core Competencies and Methodologies: Distributed Systems, System Design, Concurrency Control, Distributed L

*Experience

IndiamartNoida, India *Backend Software Engineer — June 2023 – Present*

Built a distributed Intent-to-Lead pipeline processing **2.15M+ buyer clickstream events/day**, using **Cassandra** for

Designed and implemented a WhatsApp-based enquiry generation pipeline that identified user intent for specific modules

Architected and implemented a high-performance concurrent caching layer in **Golang** leveraging in-memory storage and

Led end-to-end full-stack performance optimization initiatives by reviewing **5+ service SRS documents**, identifying

Designed and developed a **Kafka**-driven location validation and enrichment pipeline in **Golang** with **PostgreSQL**, de

Implemented Server-Side Rendering (**SSR**) using **React** and **Node.js** to enhance SEO, improve search engine indexability

Engineered scalable, data-intensive frontend architectures capable of handling **200+ concurrent asynchronous requ**

Owned and optimized automated data enrichment workflows for mobile user enquiries, increasing valid form fill rates by

Architected a unified **JavaScript** versioning and deployment framework that eliminated cross-team release dependencies

Designed and delivered a reusable UI component library comprising **20+ standardized components**, improving design

Collaborated proactively with cross-functional product, backend, and platform teams to drive rapid iteration cycles, com

Spearheaded the implementation of Google's **one-click unsubscribe** compliance feature for promotional emails, coordi

Integrated a sentiment analysis capability using HuggingFace's **multilingual BERT** model to evaluate user tone and in

Designed and orchestrated custom LLM nodes for semantic lead-matching using **LangGraph** and **LangChain**, with **L**

Built a concurrency-safe lead-routing pipeline that curates data from **10+ APIs** and routes qualified sellers to users ov

QuantumLeapRemote, India *Research and Development Intern — March 2022 – August 2022*

Engineered a full-stack decentralized application (DAO) supporting **10,000+** members and on-chain transactions, cover

Optimized gas-efficient smart contracts in **Solidity** for token distribution and stake allocation, reducing average transac

Implemented frontend-to-blockchain connectivity using **Ethers.js** and **MetaMask**, enabling wallet-based authentication

Deployed and tested smart contracts on the **Ethereum** blockchain using **Remix IDE**, validating contract logic across

*Projects **Voice-Enabled Task Tracker** — *Next.js, TypeScript, Node.js, Express, SQLite, LLMs, Docker*

Built a backend-driven task management system with REST APIs supporting CRUD operations, filtering, and search us

Designed an LLM-powered natural language processing pipeline using **Groq SDK** to convert voice input into structure

Integrated speech-to-text ingestion with backend services, enabling real-time voice-based task creation and Kanban worl

Video Conferencing App — *React JS, WebRTC, SocketIO, SQL, NodeJS, Redis, Docker*

Built a backend-driven task management system with REST APIs supporting CRUD, filtering, and search, using Node.

Designed an LLM-powered natural language processing pipeline using Groq SDK, converting voice input into structured

Integrated speech-to-text ingestion with backend services and a Next.js frontend, enabling real-time voice-based task cre

Research Publication: “A Survey Paper on Developments in Blockchain”

Authored and published a research paper at IIIT Ranchi, analyzing over **25** papers on the evolution of blockchain conse

*Education Indian Institute of Information Technology, RanchiRanchi, India B.Tech, Computer Science and Engine
